

Simplified Travel

- Final presentation in User-Centered Design
09.12.2024, University of Fribourg
- Aditya Deshpande
- Georgios Valsamidis
- Vaibhav Motwani
- Ariton Verush

Our changed UX Vision

Creating a familiar and simple yet newly intriguing way for students to book travels for themselves and friends with ease and cooperation.

Design principles most focused on:

- Recognition rather than recall
- Aesthetic design and minimalistic
- User control and freedom

Design Iteration 1

- The first iteration was made as a paper prototype mixed with Wizard of Oz Prototype.

- Advantages

- Flexibility: Quick changes can be made on paper without much work
- Time Efficiency: Faster creation and readiness of the prototype
- Efficient Testing: early testing of complex systems before they are fully build

Paper Prototype pictures (1/5)

The image displays two hand-drawn paper prototypes of a travel application interface.

Left Prototype: Main menu after Login

The top navigation bar includes a hamburger menu icon, the text "My Placeholder", a "DE/€" currency selector, and a user profile icon.

The main content area features a search form with the following fields:

- Travel (dropdown)
- Accommodation (dropdown)
- Car rental (dropdown)
- From: (text input)
- Date: (text input)
- Time: (text input)
- To: (text input)
- Date: (text input)
- Time: (text input)
- Nr. of Travelers (text input)
- Children 0-12 (text input)
- Nr of Pets (text input)
- Flights (checkbox)
- Train (checkbox)
- Bus (checkbox)
- Boat (checkbox)
- SEARCH (button)

At the bottom, there is a "Friends Online: 1" indicator with an upward arrow pointing to the top navigation bar.

Right Prototype: Friends window opening

The top navigation bar is identical to the left prototype.

The main content area features a search form with the following fields:

- Travel (dropdown)
- Accommodation (dropdown)
- Car rental (dropdown)
- From: (text input)
- Date: (text input)
- Time: (text input)
- To: (text input)
- Date: (text input)
- Time: (text input)
- Nr. of Travelers (text input)
- Children 0-12 (text input)
- Nr of Pets (text input)
- Flights (checkbox)
- Train (checkbox)
- Bus (checkbox)
- Boat (checkbox)
- SEARCH (button)

Below the search form, there is a "Friends" section with a search icon and a list of friends:

- Julia Online
- John offline last seen 2 days ago
- Tom offline last seen 7 days ago

Below the friends list, there is a "Groups" section with a list of groups:

- Paris with Julia, John, Tom

At the bottom, there are two buttons: "Make a new Group" and "Add a new friend", both with a "+" icon.

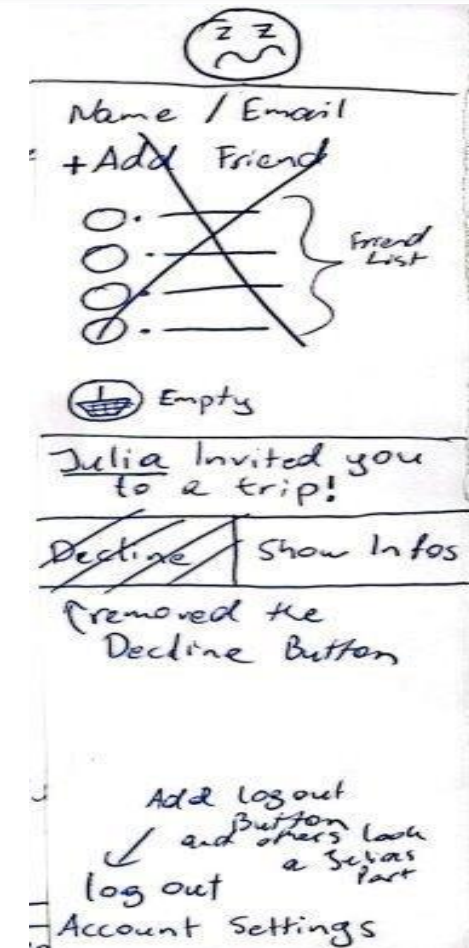

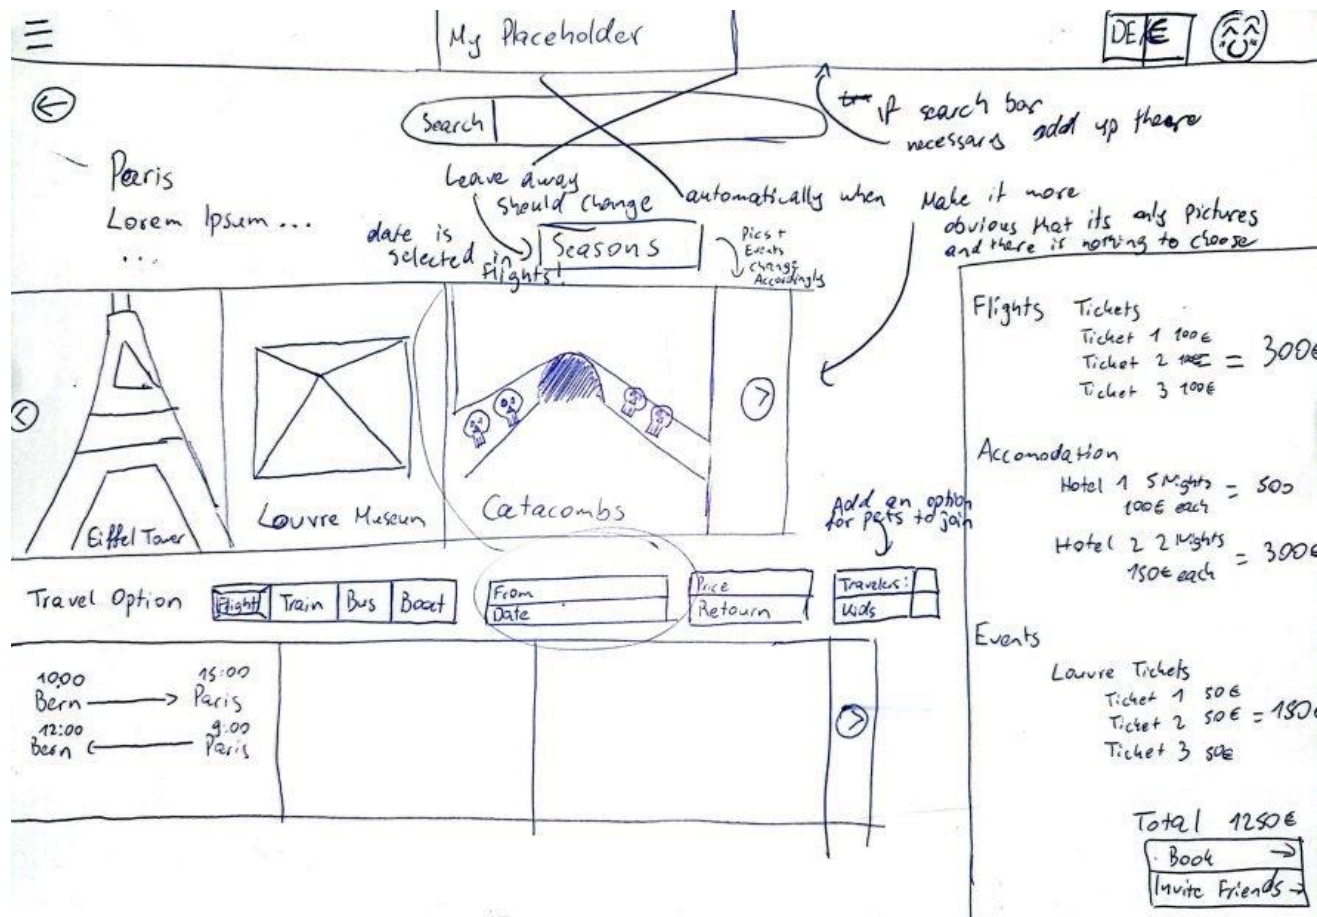

Main menu after Login

Your Total	350€

Proceed to purchase

- The Users can choose what they will pay themselves.
- Good for when someone wants to pay more than only their part!

- Receiving individual confirmations for each booked component

User Tests Round 1

- *Attempts each participant needed to finish the work
- # How easy they finished the objective
- +Overall satisfaction based on 1-5. 5 very satisfied 1 not at all satisfied

	Study	Find Login (*)	Add Friends (*)	Select Packets (*)	Invite Friends (*)	Making changes to the plan (#)	Splitting Bill (#)	Overall Satisfaction (+)
S(subject) 1	Chemistry	1	3	1	1	Easy	Medium	4
S2	Computer Science	1	3	1	1	Easy	Easy	4
S3	Computer Science	1	2	1	2	Easy	Easy	3
S4	Archeology	1	1	2	3	Easy	Medium	2

User Test R1 Personal feelings

- S1: "The Prototype was easy to understand but has some places where i had to guess"
- S2:" I found it mostly intuitive, finding/adding friends was not one of them. Some important Buttons/Features are still missing"
- S3: "All in all it was for the first visit too much different than on other sites. Maybe add some Help options or tutorials "
- S4: "I had some problems. Without extra help i would spend too much time here and would get frustrated. The Idea is good but needs some more work"

Top Problems for the participants

- Adding tutorial and help info points for new users
- Different way to enter Friends List / Add Friends etc.
- General thinking of the accomodation process. What if a person does not pay? Will the rooms/ beds stay the same or change?
- Return money but keep Infos for the trips if someone doesnt pay
- General important buttons missing

Second Iteration: Figma

- Figma
 - Advantages
 - After first iteration the biggest problems are known and wont waste time implementing "wrong" stuff
 - Can be clicked on and simulate better the real experience for users
 - Looks better than paper drawn

Second Iteration: Figma

- Figma
 - Advantages
 - After first iteration the biggest problems are known and wont waste time implementing "wrong" stuff
 - Can be clicked on and simulate better the real experience for users
 - Looks better than paper drawn
- Second Iteration
 - After getting feedback on the general idea the main User Interface could be created!
 - General design remained the same
 - User Testers thoughts and suggestions where taken into consideration
 - This iteration served as a clickable version of the Paper Prototype. It still has some flaws that would get patched in the last Figma Iteration

User Tests R2 Before and after (1/3)

Hand-drawn wireframe of a travel booking interface. The header bar contains a menu icon, the text "My Placeholder", and a user profile icon labeled "DE/E".

The main content area features a form with the following sections:

- Travel** (selected tab) and **Accommodation** / **Car Rental** (unselected tabs).
- From:** and **Date:** / **Time:** fields.
- To:** and **Date:** / **Time:** fields.
- Nr. of Travelers**, **Children 0-12 years**, and **Nr. of Pets** fields.
- Flights**, **Train**, **Bus**, and **Boat** selection buttons.
- SEARCH** button.

User Tests R2 Before and after (1/3)

A hand-drawn wireframe of a travel booking interface. The top navigation bar includes a hamburger menu icon, the text "My Placeholder", the currency "DE/€", and a user profile icon. Below the navigation bar, there are tabs for "Travel", "Accommodation", and "Car Rental". The main form contains fields for "From:", "To:", "Date:", and "Time:". Below these fields are input boxes for "Nr. of Travelers", "Children 0-12 years", and "Nr. of Pets". At the bottom of the form are buttons for "Flights", "Train", "Bus", and "Boat", followed by a large "SEARCH" button.

Travel				Accommodation	Car Rental
From:			Date:		
To:			Time:		
Nr. of Travelers		Children 0-12 years		Nr. of Pets	
Flights	Train	Bus	Boat		
SEARCH					

A digital mockup of a travel booking interface. The top navigation bar is black and features a hamburger menu icon, the "simplified TRAVEL" logo, the currency "DE/€", and a user profile icon. Below the navigation bar, there is a "My Travel" dropdown menu. The main content area has tabs for "PACKAGES", "STAY", and "FLIGHTS". The "PACKAGES" tab is active, showing a form with fields for "From:", "To:", "Date:", and "Time:". Below these fields are input boxes for "Adults:", "Children:", and "Pets:". At the bottom of the form are buttons for "FLIGHTS", "TRAIN", "BUS", and "BOAT", followed by a large "SEARCH" button. A "Friends Online (1)" notification is visible in the top right corner.

Improvements of Top User Problems

- Added tutorials and explanation blocks

Improvements of Top User Problems

- Added tutorials and explanation blocks
- Changed friend list and added chat

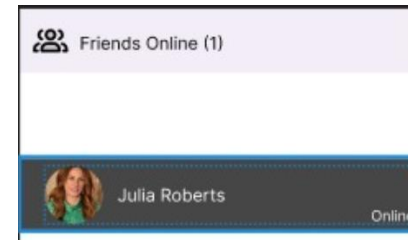

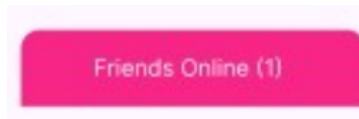

Improvements of Top User Problems

- Added tutorials and explanation blocks

- Changed friend list and added chat

- Changed accomodation process. Added fallback if one user of the group doesnt pay

User Tests Round 2

- *Attempts each participant needed to finish the work
- # How easy they finished the objective
- +Overall satisfaction based on 1-5. 5 very satisfied 1 not at all satisfied

Study	Find Login (*)	Add Friends (*)	Select Packets (*)	Invite Friends (*)	Making changes to the plan (#)	Splitting Bill (#)	Overall Satisfaction (+)
S1	1	1	1	1	Easy	Easy	4
S2	1	1	2	1	Easy	Easy	3
S3	1	1	1	1	Easy	Medium	4
S4	1	1	1	1	Easy	Easy	5

User Test R1 Personal feelings

- S1: "Everything was clear and structured. Only the different colors made me wonder if i went to a different site"
- S2: "I had a distaste for the color Pink. Doesnt seem reputable. Everything else was well build"
- S3: "Site was better structured than in the Paper Prototype. I didnt need any help to navigate through this time"
- S4: "You could clearly see that different people worked on the Sites. Something more structured would be nice"

Top User Problems

- Missunderstanding of the Emojis for the Status of the travelers

Top User Problems

- Missunderstanding of the Emojis for the status of the travelers

- Inconsistent colours on different Sub-Sites

Top User Problems

- Missunderstanding of the Emojis for the status of the travelers

- Inconsistent colours on different Sub-Sites

- Adding more pictures in the background of the site

Top User Problems

- Missunderstanding of the Emojis for the status of the travelers

- Inconsistent colours on different Sub-Sites

- Adding more pictures in the background of the site

- Some buttons are hard to read with chosen colours

Top User Problems

- Missunderstanding of the Emojis for the status of the travelers

- Inconsistent colours on different Sub-Sites

- Adding more pictures in the background of the Site

- Some buttons are hard to read with chosen colours

=> most problems are "Beauty" problems

Final Iteration

- User Testers suggestions were taken into consideration:
 - Some of them we purposely didn't fulfill because it didn't fit with the user experience vision we planned.
 - Eg: Changing the Rose tint in the background

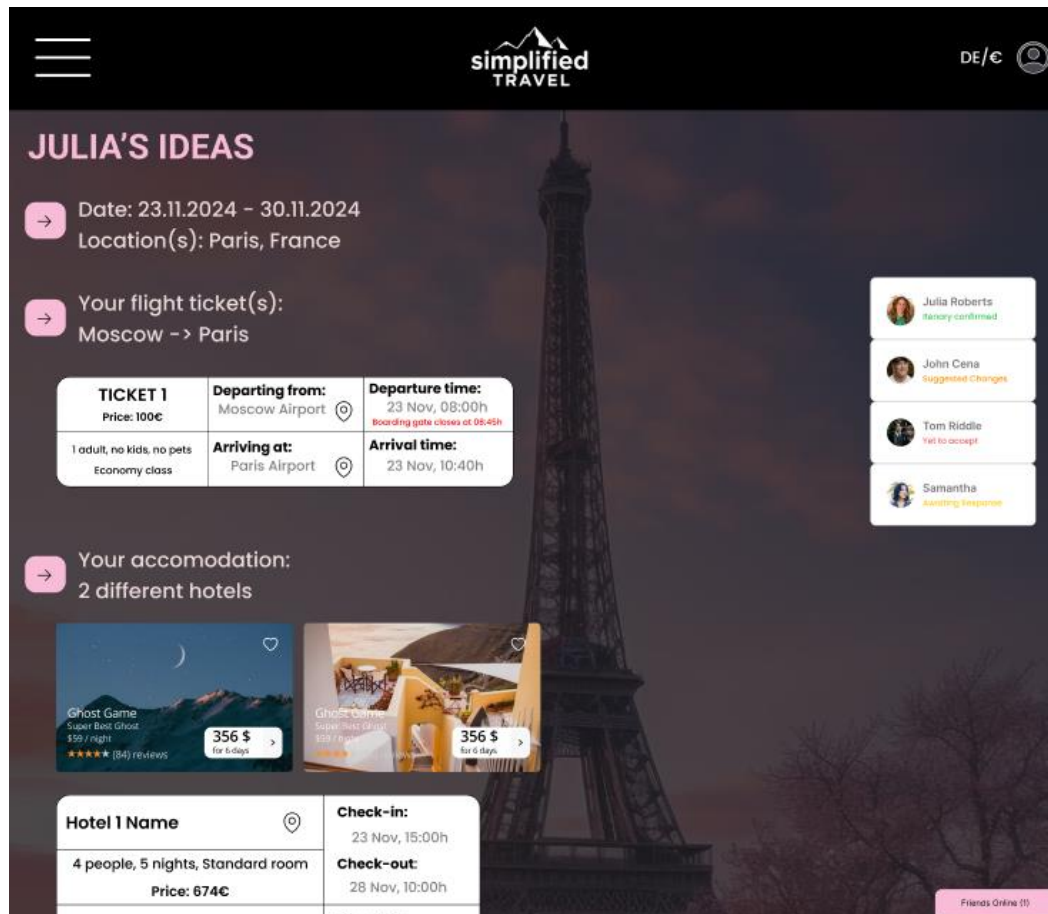

Final Iteration

- User Testers suggestions were taken into consideration:
 - Some of them we purposely didn't fulfill because it didn't fit with the user experience vision we planned.
 - Eg: Changing the Rose taint in the background

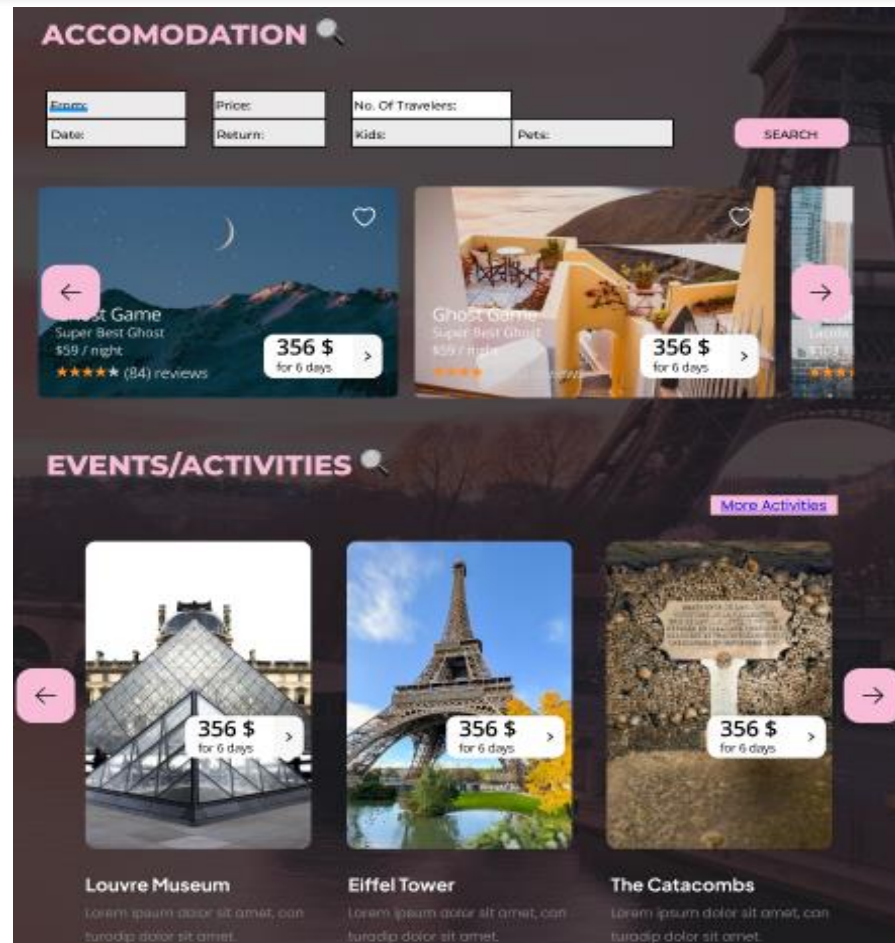

Reasoning: Site is not supposed to make you feel like it is a serious business site but a site for something fun. Not Work!

Improvements of Top User Problems

- Adding background picture
- Changed the colors of the buttons
- Enlarged the top menu

Improvements of Top User Problems

- Added arrows to showcase scrolling ability
- Added different pictures
