

Individual Contributions Report: Ariton Verush

Project Title: Fuzzy-Based Crime Prevention Strategies for Urban Safety

Contributions

1. Initial Idea and Planning

- a. Co-developed the project's vision and objectives, emphasizing community engagement and social equity.
- b. Proposed the dual-platform approach: Public Awareness and Hotspot Detection.

2. Research and Data Gathering

- a. Conducted interviews with individuals affected by crime to understand public concerns and experiences.
- b. Summarized findings from global case studies to benchmark the proposed solution against similar systems.

3. Solution Development

- a. Focused on designing the Citizen Notification System, including dynamic filtering, geo-fencing, and user segmentation.
- b. Defined the database setup and notification engine for efficient implementation and delivery.

4. Presentation Preparation

- a. Designed slides for the solution discussion and results sections.
- b. Assisted in creating visuals to effectively communicate the proposed system's impact.

5. Collaboration and Teamwork on the report

- a. Worked together throughout the whole seminar, balancing responsibilities and ensuring consistent progress. Both are currently finishing the report and equally dividing it until the end.
