

Introduction to the Team

Topic - Giving gifts

Each team member shares three ways
they connect to this topic:

Name & sketch

Vaibhav Motwani

- # Celebrating Festivals 🎅
- # Feeling Greatful
- # Granting Awards

Name & sketch

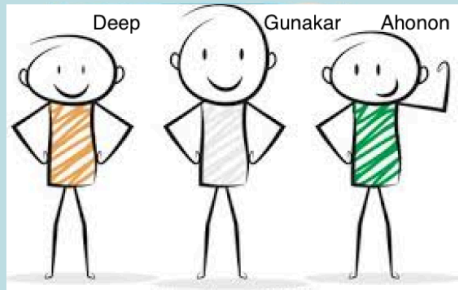

Ariton Verush

- # Celebrating occasions 🥳
- # Human Emotions and Personality
- # Curiosity, Adventure, Thrill

Meeting with the folks (Our perspective on their project)

WE TALKED TO

WE NICKNAME THEM

Mr Banana

Vitamin Guru

Gobi

THEY SAY THEY NEED TO

Improve people's health
by providing smart
grocery shopping lists

They want people to
complete their daily
nutrition goals
(Macros as well as
Micros)

THE UNDERLYING PROBLEM

Shopping to meet your
nutrition goals, stay
healthy, and stick to a
budget can be quite
challenging

YOUR CHALLENGE

Prices for the same
products vary across
different markets. How
do you calculate the
budget?

How do you take care of
User preferences Ex.
Allergies, lactose
tolerance, likings etc.?

How do you evaluate that
your suggestions are
helping people meet their
nutrition needs?

YOUR SOLUTION

The Prices are proportional in different supermarkets like coop, aldi etc
So they can suggest buying from corresponding supermarket.

1. Before taking user through the journey, ask him his preferences, allergies (if any exists) etc.
2. Allow users to save their preferences so they don't have to enter the same information each time.

1. Take user feedback on how much they are liking to use this platform.
2. Take user feedback on whether this is helping with their nutrition needs
3. Rate grocery shopping experience

Testing our prototype

(Their perspective on our project.)

Hand your prototype to your interviewee.

What do they think?

A platform which asks a set of questions about your budget, target's personality and interests, and suggests some interesting set of gifts that the target will feel happy about.

Decisions are made with degrees of truth rather than strict boundaries. This reflects the reality of human decision-making when giving gifts.

+

WHAT WORKS (AND WHY)

QUESTIONS WE HAVE

1. Would a common person use this platform often to find curated gifts?
2. What if the person is not able to find something that's perfect for the occasion?

?

1. It shouldn't be a mobile app, because people will not download it to use it once in a while
2. We are unable to curate highly personalized gifts because there are so many options in the gifting world and so many possibilities for customization.

-

WHAT DOESN'T (AND WHY)

TEST YOUR IDEA

NEW IDEAS

1. A fun game where someone tries to reveal their surprise gift as a questionnaire which leads them guessing the correct gift. Every answer reveal is a thrill journey in its own.
2. We start suggesting gifts after some minimum threshold value and user can choose out of them but if he is not satisfied, we keep asking him more personalised questions that will fit his needs. He can always go back and change preferences.
